Creativity Tool #20- Ball Throw

o Pick a problem, challenge, or opportunity

o Make a big ball out of flip chart paper and tape

o When the ball is thrown at random to a person in the group, that person has to think of an idea (they have to say something even if it doesn't make sense). That person then throws it to someone else.

o Someone writes down the ideas on a chart

o Continue for 15 minutes

o Discuss and further mind spark the captured ideas on the chart
